

Job Description – Systems Engineer

JOB DESCRIPTION

Trusted Network Solutions, a leading Value Added Reseller, is looking for an experienced systems engineer to join our team. The position will entail working directly with our client base as an outside technical field engineer (post-sales engineering). The focus will be on network infrastructure and security projects. Example projects include configuring Windows servers, deploying MS Exchange Server, managing backup and storage systems, troubleshooting server problems, and securing networks. In addition, some time will be spent assisting the sales department with the creation of valid configurations and quotes for technical solutions (pre-sales engineering).

REQUIRED SOFT SKILLS

- Professional appearance
- Integrity and honesty
- Excellent written and verbal communication skills
- Excellent organizational skills
- Excellent troubleshooting skills
- Self motivated and disciplined
- Ability to explain technical concepts to non-technical individuals
- Desire to learn and believes in continuing education
- Cool head in stressful situations
- Self confidence
- Must be able to work independently and as a member of a team

REQUIRED HARD SKILLS

- 3 - 5 years working full-time in the IT field administering Windows Server and Exchange Servers
- MCSE 2003 Certification
- Exchange 2003 Certification
- Firm understanding of Microsoft based networks and Microsoft operating systems
- Understanding of basic and advanced networking concepts (IP Addressing, routing, switching, OSI, DHCP, DNS, SMTP, protocol analysis, etc.)
- Basic storage experience (DAS, SAN, NAS, backup and recovery, etc.)
- Ability to troubleshoot a technical problem in an efficient and logical manner
- Create and maintain documentation as it relates to network configurations
- Conduct research on network products, services, protocols, and standards

DESIRABLE SOFT SKILLS

- College graduate
- Experience managing accounts as an independent consultant
- Relationships with others in the IT industry
- Public speaking skills
- Ability to lead technical seminars

DESIRABLE HARD SKILLS

- Two or more years working as an IT consultant with a network infrastructure and security focus
- Experience migrating from Exchange 2000/2003 to Exchange 2007
- Linux systems configuration, administration, and security
- Background in network security (OS hardening, security audits, penetration testing, etc.)
- Advanced industry certifications such as CCISP, FNCNE, MCSE, CCNP, JNCIS, etc.
- Experience with high-end storage (SAN, HSM, etc.)
